Java, C#, C++ | Full-Stack Development | Aspiring Software Engineer rrajp025@uottawa.ca
Orléans (Ottawa), ON K4A 3C7 linkedin.com/in/roro05 | github.com/DevRohan05

SUMMARY OF QUALIFICATIONS

- First-year Software Engineering CO-OP student at the University of Ottawa
- Nearly three years of professional experience as a Programmer Analyst, building and maintaining applications in C#, C++ and Java
- Hands-on with the full development cycle: analysis, development, testing and deployment
- Problem-solver who is comfortable tracing bugs across front-end code, back-end services and databases
- Collaborative teammate who learns quickly and keeps up with new tools, including AI-assisted development
- Fluent in English and French

EDUCATION

Bachelor of Applied Science, Software Engineering (CO-OP) Sept 2026 – present
University of Ottawa (Ottawa, ON)

- Expected graduation: April 2031

Attestation of Collegial Studies (AEC), Computer Programmer Analyst 2021 – 2023
Collège Multihexa (Chicoutimi, QC)

- Built full-stack web, mobile and database projects in PHP, ASP.NET, Kotlin and Python (see Applied Projects)

RELEVANT SKILLS

Technical

- Programming languages: C#, C++, Java, Python, PHP, JavaScript, Kotlin, VB.NET, SQL
- Frameworks and web: ASP.NET MVC, .NET 6, Java Spring, GWT, Angular, React, Ionic, HTML5, CSS, AJAX
- Databases: Oracle, SQL Server, MySQL, Microsoft Access
- Tools: Git, SourceTree, Docker, Azure DevOps, Postman, Visual Studio, Eclipse, Android Studio, Toad
- APIs and integrations: ASP.NET Web API, Google APIs, Zoom API, SendGrid

Software Development

- Delivered features from analysis through testing and deployment for production applications in C#, C++ and Java (Spring)
- Refactored existing code to make it easier to maintain and to reduce technical debt
- Tested and debugged APIs with Postman and wrote T-SQL and Oracle queries to track down data issues
- Applied a CodeFirst approach to design databases and models in ASP.NET projects

Communication and Teamwork

- Worked with teammates to scope projects and propose where AI could replace manual, repetitive workflows
- Explained technical work clearly to colleagues in both English and French
- Researched new tools and methods independently, then shared what I found with the team

Rohan Rajput – 581-306-1429

APPLIED PROJECTS

- **Ureality Web App:** developed features for an e-commerce site selling watches, necklaces and devices that use AR and holograms for real-time video calls, so people can feel present with loved ones
- **Hotel Reservation and Management System:** built with PHP, MySQL, JavaScript and AJAX; includes SMTP email verification, availability checks, online payment, cancellation refunds and invoice generation
- **E-commerce Web App:** developed a PHP and MySQL shopping cart with a product catalogue and checkout
- **Tech Products Forum:** created a discussion and messaging forum using ASP.NET MVC
- **Mobile Applications:** built a cross-platform cart and tax calculator app with Ionic and React, plus native Android apps in Kotlin
- **Python Utilities:** wrote a phone locator and a WhatsApp bot, and practised with Tic-Tac-Toe and Turtle graphics

RELEVANT WORK EXPERIENCE

Programmer Analyst Oct 2023 – Jun 2026

Systèmes Médicaux Imagem Inc., *Chicoutimi*, *QC*

- Delivered applications in C#, C++ and Java (Spring) across the full lifecycle, from development and testing through to deployment
- Built new features and enhanced existing systems, improving their performance and reliability
- Developed and maintained a GWT-based Java web application, working on both the front end and the back end
- Analyzed and scoped projects that use AI to turn manual, human-driven workflows into automated systems
- Refactored code on an ongoing basis to strengthen maintainability and reduce technical debt
- Queried and troubleshot data in Oracle Database using Toad; managed source code with Git and SourceTree
- Containerized builds and deployments with Docker while developing in Eclipse and Visual Studio

Web Development Intern Jun 2023 – Aug 2023

Labourly, *London*, *ON*

- Built a web application using C# ASP.NET 6 MVC and the CodeFirst approach, integrating the Zoom and Google APIs
- Contributed to the design and development of Zoom Recording Downloader, a third-party web application
- Supported database management in MySQL and SQL Server
- Researched and analyzed AI methods for possible integration into the product
